Product Name :	**Product Code :**
Digital Interface	CENG0009

Description :

Digital Interface

Technical Specification :

- The Digital Interface is for use with most products in Control Engineering range, but it will also work with any other compatible laboratory equipment.
- It is an alternative to the Controller, when the user only needs the interface part.
- It converts analogue inputs from other equipment into digital signals for a computer.
- It will allow the user to monitor up to eight input signals and control up to four output signals.
- It also converts the digital signals from a computer into analogue signals to control other equipment.
