

Product Name :
Fraction Demonstration Board

Product Code :
ALABS-A72-006

Description :

Fraction Demonstration Board

These are rectangular pieces that are all the same height, but with lengths determined by the fractional part they represent. When all the fractional pieces of each color are put together, they form bars, or rows, that are the same total length. Tiles are marked with the fractions they represent. By placing strings of tiles beneath each other, it is easy to determine equivalence.
