

Product Name :
Gas Welding Goggles**Product Code :**
TVETWD23013**Description :**

Gas Welding Goggles

Technical Specification :

Gas welding goggles should be used whenever gas welding, brazing or cutting.

In gas welding, cutting and brazing, protection must be given against possible injurious radiation and at the same time the visible radiation should be reduced to a comfortable level.

For such processes, sufficient protection will usually be given by goggles fitted with the appropriate shade lens.

They also protect the eyes from splashes and flying particles.
