

Product Name :
Compressor Analyzer

Product Code :
TVETWE24012

Description :

Compressor Analyzer

Technical Specification :

Compressor Analyzer tests all single phase compressors up to 5 HP, 110, 220, or 277 volts.

Educational Lab Equipments comes equipped with a built-in 200 micro farad start capacitor.

Designed for testing motor windings and jump-starting compressors that are locked up.

Feature:-

Tests start and run capacitors and system relays by substitution

Measures running amps, 0-10, 50A range

Measures start and run volts, 0-150, 600V AC ranges

Tied-up compressors may be freed by reversing motor rotations

Tests windings for opens, continuity, and grounds

Compressors are tested in the manner in which they were designed to operate: Split-phase, capacitor start, or PSC

Has provisions for connecting external run capacitor.

30A breaker protected to allow high starting current with adequate overload protection

Complete with 220V adapter cord and capacitor leads
