

Product Name :
Drying Oven

Product Code :
TVETCL29013

Description :

Drying Oven

Technical Specification :

Interior body is made of stainless steel by argon-arc-welding technique.

Drying large quantities of aggregate samples.

Also in drying large quantities of soil samples.

Exterior body is made of high-quality steel sheet with a novel appearance.

Temperature control protection.

Digital display.

Microcomputer PID temperature controller with a timer function to ensure precise & reliable temperature control.

Hot air circulation system is composed of the blower fan and proper air channels.

Oven door with Silicon gasket & transparent thermal glass window for watching the samples under drying.

Can adjust blast and exhaust in control panel.

Specification:-

Capacity: 225 liters

Temperature Resolution: $\pm 0.10\text{C}$

Rated power heater elements: 2.5 KW

Temp. range: +50-300°C

Time Locating Range: 1-9999 min

Temp. Fluctuation: ± 0.75 0C

Shelves: 3

Shelf Positions: 4
