

Product Name :
Laboratory Bench Oven**Product Code :**
TVETSO30001**Description :**

Laboratory Bench Oven

Technical Specification :

Use: General drying of samples in the laboratory.

Interior body is made of stainless steel by argon-arc-welding technique.

Oven door with Silicon gasket & transparent thermal glass window for watching the samples under drying.

Temperature control protection.

Digital display.

Exterior body is made of high-quality steel sheet with a novel appearance.

Hot air circulation system is composed of the blower fan and proper air channels.

Microcomputer PID temperature controller with a timer function to ensure precise & reliable temperature control.

Can adjust blast and exhaust in control panel.

Specification:-

Temp. range: +50-300°C.

Time Locating Range: 1-9999Min.

Temp. Fluctuation: ± 0.75 0C.

Capacity: 220 liters.

Temperature Resolution: $\pm 0.10^{\circ}\text{C}$.

Rated power heater elements: 2.4 KW

Shelves: 2, Shelf positions; 3
