

Product Name :
Compressible Flow Bench

Product Code :
TVETHY31002

A large, light gray watermark of the ALTEC logo is centered in the main content area.

Description :

Compressible Flow Bench

Technical Specification :

The unit should be bench top and self-contained having its own means of pressure generation.

Panel mounted U tube and inclined tube manometer together with a positive pressure bourdon tube pressure gauge and compound pressure gauge.

Pressure measurement bench allows the student to investigate the measurement of one of the fundamental parameters that will be present in almost every branch of engineering and physics.

All of the manometers and the panel mounted pressure gauges may be

interconnected and linked to the common pressure source supplied.

The manometers should allow investigation of the use of U and inclined tubes for pressure measurement and demonstrate the use of fluids of different density.
