

Product Name :

Smart Mill 500

Product Code :

TVETCN35014

A large, light gray watermark of the ALTEC logo is centered in the main content area of the page.**Description :**

Smart Mill 500

Technical Specification :

The machine concept of the Smart mill series convinces by compact design, High rigidity through box structured base & column design with the highest quality.

It is a rigid & steady design in its class with high levels accuracy to achieve quality milling components.

It is a Total Productivity Maintenance friendly designed Vertical Machining Center.

Educational Lab Equipments brings to you the smart mill series of VMCs with features such as 8,000 rpm spindle with CTS, tool magazine 20 tools with double gripper ATC, side chip conveyor with built in the coolant

system, high rapid traverses and high-tech controls.

Various options make this model a flexible means of production.

Sustained quality performance due to high rigidity, and thermal stability.

Operator's comfort due to environment-friendly working.

Machine Standard Accessories:-

Coolant tank, pump with chip tray

Screw type chip conveyor

Leveling bolts & pads

Rigid Tapping

Work light

Pilot light

Operating Manual

Programmable Manual

Optional Accessories:-

Spindle through coolant

Spindle motor 7/9 Kw

4th axis CNC rotary table

Spindle speed 10000 rpm

Voltage stabilizer / Isolation Transformer

Tooling/fixtures as per customer need
