

Product Name :
Hybrid Vehicle Systems Panel Trainer**Product Code :**
TVETAU36006**Description :**

Hybrid Vehicle Systems Panel Trainer

Technical Specification :

This trainer provides students and instructors with the opportunity to demonstrate, investigate and fault-find a simulation of a hybrid vehicle electrical system.

The trainer is designed to allow access to a simulation of the mechanical operation as well as provide a mimic of the electrical power flow.

The panel also includes test points at a safe voltage level to allow for investigation of electrical circuits.

To facilitate the development of techniques in diagnostics and

fault-finding skills, the panel includes a range of fault-insertion options to simulate typical realworld system malfunctions.

Typical practical tasks include:-

Electric motors

Storage devices

Hybrid engines

Series, parallel and series-parallel systems

Hybrid brake systems

Cables, connectors, protection devices and controllers

Power-control modules

Safety

Routine maintenance and repair

Equipments Exporters
