

Product Name :
Dead Weight Pressure Gauge Tester

Product Code :
TVETTH37009

A large, light gray watermark of the ALTEC logo is centered in the background of the main content area.

Description :

Dead Weight Pressure Gauge Tester

Technical Specification :

Dead weight Pressure Gauge Tester is manufactured to measure the Pressure gauge up to the capacity of 25kg/cm².

The weights are Zink Iron for long term use.

The system is nickled chrome to protect from rust.

Experiments:-

Study of the hydrostatic force on a plane surface under different submerged conditions.

Features:-

Superb Painted structure

Simple to operate & maintain

Utilities Required:-

Machine Oil.

Specification:-

Bourdon tube pressure gauge as manometer.

Manometer with transparent scale.

Components arranged on base plate.

Manufactured from corrosion resistant materials.

Set of weights

Medium for transmitting pressure:- Hydraulic
