

Product Name :
Laboratory Pasteuriser

Product Code :
TVETWT28006

A large, light gray watermark of the ALTEC logo is centered in the background of the main content area.

Description :

Laboratory Pasteuriser

Technical Specification :

The Laboratory Pasteuriser is a benchtop unit designed to provide practical training for the operation of a large modern pasteurizing plant.

The unit may also be used for project work, in particular, to measure the effects on product quality of different process conditions.

Features:-

Control console incorporating comprehensive instrumentation.

Variable product temperature and holding time

Miniature plate heat exchanger

Choice of holding tubes

Fully self-contained design with integral hot water system

Benefits:-

Tests can be carried out quickly and easily

Benchtop operation

Simulates the conditions used in a production plant

Small quantities of liquid product can be processed

Applications:-

Destruction of spoilage organisms

Arresting of enzyme activity

Arresting of yeast activity

Quality control

HTST pasteurization of milk Destruction of spoilage organisms
