

**Product Name :**  
Static Type A.C To D.C Power Supply Panel

**Product Code :**  
ALABS-A237-004

**Description :**

Static Type A.C To D.C Power Supply Panel

**Technical Specification :**

Cooper wounded transformer with stamping for the boost, buck and step down. To increase and decrease the output voltage the auto manual switches are fitted on front panel. Short circuit and open circuit are protected by fuses and MCB. Voltage and ammeter are fitted on front panel protection from reverse supply due to reverse diode in the circuit. Trolley with MS powder coating is in housed. It is designed for 3 ph A.C. input 350v to 460v with output of 220v D.C. Working under manual and auto modes.
