Panel For Testing Of Buchloz Relay Setup

Technical Specification :

These panels are used mostly to test the Buchloz Relays for the durable performance without any fault. The main function of these relays is to detect an abnormal condition in the tank itself only and to the alarm trip signal.

Features:-

- Inbuilt indicator of power on and trip indicator.
- Gas Actuated Buchloz relay.
- Digital A.C. Ammeter and Digital A.C. Voltmeter.
- Relay with gas compressor available.
- Both protection circuit and control circuit are in built and duly wired.
- To perform the experiments the necessary patch chords and terminals are required for the relay.
