

Product Name :
Dead Weight Pressure Gauge Tester**Product Code :**
EEFUD62M0002**Description :**

Dead Weight Pressure Gauge Tester

Technical Specification :

Experimentation: To calibrate a given pressure gauge. Utilities Required : Space 0.5 m x 0.5 m at working height. SAE 40 20W40 : 0.5 Ltr. Table for setup support. Description: The present set-up is designed to calibrate and check the given pressure gauge (Bourdon Type). This unit consists of a precision ground plunger, which develops the required pressure by loading of weights. This pressure is transmitted to the pressure gauge by oil.

Technical Details of Dead Weight Pressure Gauge Tester:

Precision ground plunger to develop the required pressure. Valves Arrangement to fill oil. Pressure Gauge (Bourdon Type) of 7 kg/cm² Weight set for the pressure of 0.5 to 7kg/cm² An ENGLISH instruction manual consisting of experimental procedures, block diagram etc. will be provided along with the Apparatus The whole set-up is well designed and arranged on a rigid structure painted with industrial PU Paint.
