

**Product Name :**  
Flow of Fluid Study System

**Product Code :**  
EEFUD62M0006

**Description :**

Flow of Fluid Study System

**Technical Specification :**

**Accessories:**

Rugged stainless steel construction

with Fixed or Adjustable split ratios

Interchangeable fluid resistors

Fluid resistor technology

Split ratios are stable and reproducible, and not affected by changes in viscosity or pressure

Adjustable metering valve.

Easy to use interchangeable fluid resistors make it possible to achieve split ratios from 1:1 to 20:1

Ultra low dead volume fluidic design
