

Product Name :
Near Infrared Spectrophotometer

Product Code :
EEFOD63M0005

Description :

Near Infrared Spectrophotometer

Technical Specification :

Specification:-

- PC controlled advanced FT-NIR system (220-240V V) with windows based operation/working software as well as handling both solid as well as liquid samples with minimum following specifications
- Spectral Range : Transmission 14000-2200 cm-1 or better

Spectral Range 14000-2200 cm-1 or better

Spectral Resolution better

Wavelength precision

Wavelength accuracy

Signal to Noise ratio

Source or other suitable for above range (sr. no. 1)

Vibration isolated mechanism

Detectors the range at Sr. no. 1 as well as sensitivity

Software software Capable of operating in Windows XP or other versions Equipped with basic and advanced data manipulations

routines, Spectral calculator, Spectral comparison

Banded PC to be supplied along with UPS, Laser printer, interface, licensed software including NORTON antivirus software etc.

UPS able of running the equipment safely provided

Accessories handling liquid samples, measurement of solids (integrating sphere) etc., disposable glass vials provided
