

Product Name :
Force Sensor Tensiometer**Product Code :**
EEIEL70M0006**Description :**

Force Sensor Tensiometer

Technical Specification :

Specification:-

Force sensor tensiometer for measuring static interfacial tension and surface tension:

The tensile force which occurs as a result of wetting an immersed probe is measured with reference to the wetted length.

Technical Specifications:-

- Measuring Probe: Ring (Du Noüy ring method) or Plate (Wilhelmy plate method).
- Medium to Upper Measuring range: 1-100 mN/m; Instruments: K100, K11, K20

Address: 75, Lajpat Nagar-IV, New Delhi-110024 **Phone:** +91-9311469084
