Torsion Apparatus**Product Code :**  
EEMEC73M0002**Description :**

Torsion Apparatus

**Technical Specification :****Description**

Torsion Apparatus is a most useful piece of bench mounted equipment and consists of a horizontal unit to take specimens up to 6 mm diameter by 450 mm long (0.25 inches x 18 inches). The torsion head is supported in ball bearings and torque is applied by a mass hanger and masses. Angular displacement is measured by a dial and pointer which can slide along the base to enable readings to be taken at any point. Supplied complete with a stainless steel specimen of 6 mm dia and one pointer.

**Applications**

- Demonstration of torsion characteristics of small diameter rods of different materials
- Determination of modulus of rigidity of different materials

**Features**

- Compact bench top unit

- Simple operation, with accurate repeatable results

#### Dimensions

- 41 cm long x 20.5 cm wide x 22 cm high
- Gross : 18 Kg
