

Product Name :
Sound Level with Noise Monitoring

Product Code :
EVTE0001

Description :

Sound Level with Noise Monitoring

Technical Specification :

Sound Level / Noise Monitoring devices help in measuring sound pressure level and find common usage in noise pollution studies for quantification of almost any noise and are especially useful for monitoring of environmental, industrial and aircraft noise. Functioning as digital sound level meters, these are most preferred as well as cost effective models and come with working specifications like 10mm (0.4") of LCD Display, Auto Manual Shutdown, Low Battery Indication, DC Output of 0 ~ 1.3V 10mV/dB, 'A', 'C' or 'Flat' weighing with Slow/Fast response, Optional RS-232 Communication, Alarm o/p comprising LED Optional Relay output, Measurement options of LP, Leq, LN and Manual Data storage of up to 30 readings. We can deliver these solutions under different models to exactly match up with the end process needs of the users.
