

Product Name :
Modular Power System**Product Code :**
ELPS0003ALTEC™**Description :**

Modular Power System

Technical Specification :

- It is needed to connect two or more of the modules together.
- When connected to a suitable mains supply, the hub provides power for each part of the Modular Power System.
- It also links the electrical test circuits so students do not need to use long test leads between modules.
- The hub links the emergency stop buttons of each connected module to give better safety in the laboratory.
- One setting stops the power to only the affected module of the Modular Power System, leaving the others still powered.
- The emergency stop setting switch is a keyswitch to prevent unauthorised use.
- The other setting stops the power to all modules of the Modular Power System.
