

Product Name :

Brinell Indenter

Product Code :

MTEP0017

ALTEC™**Description :**

Brinell Indenter

Technical Specification :

- The indenter uses a hardened steel ball in a holder that pushes down onto a suitable test specimen and creates a small dent.
- Using the dimensions of the dent, the indenter ball and the force applied gives the Brinell hardness number of the specimen material.
- The hand-held magnifier has a measurement scale or 'graticule' for accurate measurement of the dent.
