

Product Name :
Tensile Tester Kit

Product Code :
MTEP0021

A large, light gray watermark of the ALTEC logo is centered in the main content area of the page.

Description :

Tensile Tester Kit

Technical Specification :

- This kit includes a cased tensile tester with specimens of different materials for students to stretch specimens to destruction, while measuring the extension and force.

The tests introduce students to tensile test terms including:

- Yield properties.
- Tensile strength.
- Elongation.
- Overall stress and strain.
