

Product Name :
4 Stroke Diesel Engine

Product Code :
ENGP0004

A large, light gray watermark of the ALTEC logo is centered in the main content area of the page.

Description :

4 Stroke Diesel Engine

Technical Specification :

- The engine has a modified cylinder head and crank.
- The engine is mounted on a sturdy precision bed plate.
- This minimises the time spent replacing one engine with another.
- These can then connect to the Engine Cycle Analyser to extend the range of experiments possible.
- The bed plate has dowels and slots which align and locate it accurately with the dynamometer test set.
- These allow use with the Cylinder Head Pressure Transducer and the Crank Angle Encoder.
