

Product Name :

Vane Pump

Product Code :

ALABS-A43-093

ALTEC™**Description :**

Vane Pump

Technical Specification :

- Dimensions: 300 mm x 300 mm x 300 mm (approx)
- Weight: 9 kg
- For use with the Positive Displacement Pump Module this pump is ideal for student experiments, demonstrations and projects.
- The vane pump is a positive displacement pump.
- It has a fixed displacement balanced vane that delivers a given volume of fluid (oil) for each full rotation of the pump shaft.
- The pump rotation determines the flow direction, but you only test the pump in one direction, determined by the Universal Dynamometer.
- Self-sealing connections reduce oil spillage and simplify installing the pump to the pump module.
