Product Name : Pipe Flow And Nozzle Kit		Product Code : ALABS-A43-111	
	ALTE	C [™]	
Description :			
Pipe Flow And Nozzle Kit			
Technical Specification :			
	engths of smooth-walled pipe wi let, so it becomes a suction fan		ppings and a Pitot traverse.

Email · sales@equinmentsexporters com

• A Pitot traverse fits at the end of one long pipe to allow you to measure the velocity profile across a pipe and calculate the theoretical flow.

• The pipe tappings connect to a multiway pressure display.

• The multiple pressure tappings along the long pipes allow you to measure the pressure drop and therefore losses along them.

• A probe mounts in an assembly so that it moves axially through an additional nozzle to measure its axial pressure profile.

• This allows a comparison with the flow found from the nozzle and the orifice plate included with the kit.

• The kit includes three different fittings: two elbows and a bend, that each fit between the long pipes to test the pressure drop and therefore loss caused by the fitting.
