

Product Name :

Geoboard

Product Code :

PRMT0018

**Description :**

Geoboard

Technical Specification :

Properties of polygons in terms of angles

Gets the feel of an angle through observation

Exploring parallel and intersection lines

Making different triangles, quadrilaterals and other polygons and exploring their properties on the basis of side

Explores intuitively rotations and reflections of familiar 2-D shapes

Exploring properties of circles and chords.

Identifies right angles and classifies angles into right, acute and obtuse angles

For 1-2 children/ age 6 years and above

Square plastic board with pins and rubber bands to make and understand geometric properties of polygons and circles. Worksheets with printed grid.
