

Product Name :
Centrifuge Extractor Hand Operated**Product Code :**
CELB0008ALTEC™**Description :**

Centrifuge Extractor Hand Operated

Technical Specification :

- The Instrument is used for determination and checking of Bitumen percentage in Bituminous mix, the mix is added with a solvent and dissolved bitumen is removed by centrifugal action.
- A drain is provided to collect dissolved Bitumen coming out of the rotating bowl and getting collected in the housing.
- The bowl assembly is mounted on a vertical shaft, which protrudes from a cast housing.
- This shaft and thus the bowl is rotated fast manually by enclosed gears in the cast body and handle.
- Solvent is introduced during the test through the holes in the cap of the housing.
- Consists of a removable Aluminum rotor bowl, Capacity 1500 gms.
- With a cap and tightening nut.
