

Product Name :
Mould Plastic for Concrete Latrine Slab**Product Code :**
NTH0014ALTEC™**Description :**

Mould Plastic for Concrete Latrine Slab

Technical Specification :

Polymeric mould for concrete latrine slab

Plastic form made of high quality polymers with very smooth finish. The material of the form is UV protected; impact resistant; thickness of the mould material is 4 mm and can stand rough handling under field conditions.

The finished latrine slab will have horizontal dimensions of (60 x 60 cm) and thickness of around 8 cm. The produced slab has two raised foot rests and a drop-hole with dimensions well selected to make it safe for use by small children. The finished surfaces have slopes towards the drop hole for easy cleaning.
