

Product Name :
Spot Welding Machines**Product Code :**
EEMECH45M0027**Description :**

Spot Welding Machines

Technical Specification :

- Upper electrode is actuated by foot lever or by air cylinder.
- The electrode force can easily be calculated in both systems.
- The 63KVA AC metal spot welding machine is electric resistance projection welders with an asymmetrical body design. The automatic welding equipment is used for welding iron, copper, aluminum, stainless steel, and other materials.
- By tap method with 8 tap adjustments on primary of the main transformer having current control from 50% to 100% in 8 steps.
- Air system is provided with gauge and manual system with calibrated spring.
- All air accessories such as filter, lubricator, regulator, gauge, solenoid valve and speed valve are incorporated.
- By tap link method with 8 tap adjustments on primary of the main transformer having current control
Electrodes, Electrode holders, Arms, Transformer are all water cooled with one single water-cooling circuit.
