

**Product Name:** 

Axial Flow Turbine test bed

**Product Code:** 

EEMECH45M0066

## **Description:**

Axial Flow Turbine test bed

## **Technical Specification:**

- Single point pivot on engine mounting enables accurate thrust measurement.
- No need for external lubrication system.
- No need for external battery and charger.
- Fully tested for high performance and safety.
- Tough, transparent polycarbonate safety screen.
- An optional floor-standing frame is available to house the unit together with its fuel tank and electronic console.
- The engine has been integrated into a sturdy metal frame that holds it firmly, while enabling accurate measurement of the thrust produced by the engine.
- An electronic preprogrammed controller constantly supervises the engine, ensuring safe operating conditions at all times.
- The engine inlet has been replaced with a custom fabricated frontal duct, to enable the air mass flow rate to be accurately measured.

Thrust: 200N typical

Mass flow: 450 g/s

Ignition system: Glow plug

• Engine rpm: 105,000rpm typical

Engine mount: Single pivot point

Dimension: 880 x 510 x 1185 mm

Weight: 150 kg (approx)

Exhaust gas temperature: 800°C typical

Compressor type: Single-stage radial

· Turbine type: Single-stage, low-mass axial flow
