

Product Name :

Corollis Component of Acceleration Apparatus

Product Code :

EEMECH45M0091

ALTEC™**Description :**

Corollis Component of Acceleration Apparatus

Technical Specification :

- Water Tank: Made of Stainless Steel
- Rotating Arms: 9mm/6mm orifice diameter, Length 300 mm.
- Rota meter: 250 to 2500 LPH
- Electric Motor: Swinging field, Variable speed.
- Pump: FHP for water circulation.
- Dimension: 800 x 800 x 1200 mm
- Weight: 115kg
- Coriolis components of Acceleration can be determined at various speeds of rotation at water flow rates.
- The equipment's is self contained, water re-circulating, provided with its own speed control unit and water-circulating pump.
- The whole set-up is ingeniously designed and schematically arranged on a powder-coated rigid structure.

- 230V, 50Hz, 1 phase
- 230V, 60Hz, 1 phase; 120V, 60Hz, 1 phase
