

**Product Name :**  
PLC Controlled Process Control Trainer

**Product Code :**  
EEPLC78P0005

**Description :**

PLC Controlled Process Control Trainer

**Technical Specification :**

Process control is the abbreviation for automatic control of production process, which is an important part of automation technology. Usually refers to the continuous or automatic control of the production process in the industrial production of petroleum, chemical industry, electric power, metallurgy, light industry, building materials, nuclear energy and so on. In the modern industrial production process, process control technology is playing an increasingly important role in achieving various optimal technical and economic indicators, improving economic benefits and labor productivity, improving labor conditions, and protecting the ecological environment.
