Product Name :
Full-Automatic Spray Etching Machine

Product Code :
PCBL0001

Description :

Full-Automatic Spray Etching Machine

Technical Specification :

Horizontal working type: system can simulate horizontal type equipment of manufacturing enterprise, staff only need put board and fetch board.

It adapt electrification control panel, easy to use, concise, high safety performance.

It adapt double filtration system, spray pump with filtration device, with the addition of dedicated filtration device, it can strict avoid the impurity in the corrosive liquid jam the nozzle.

It adapt dedicated smart model acid and alkali resistant gearing, roller shaft and nozzle adapt full combined type installation, is easy to disassembly and maintain.
