

Product Name :
Pneumatic Training Kit

Product Code :
PTEN0001

Description :

Pneumatic Training Kit

Technical Specification :

Kit type pneumatic training system is designed according to "Hydraulic and Pneumatic Drive" and "Pneumatic Control Technology" to meet teaching requirement of modern pneumatic major. This system can not only conduct conventional pneumatic basic control circuit experiment, but also conduct application experiment of simulate pneumatic control technology and course design of pneumatic technology, it can make students accomplish design of smart control circuit. In a word, the system is typical experiment equipment with perfect combination of mechanical and electrical.
