

Product Name :
Automatic Robot Training Bench

Product Code :
MCHT0011

Description :

Automatic Robot Training Bench

Technical Specification :

It adopts high-performance 32-bit CPU, drive device adopts subdivision step motor or AC servo motor, it is equipped with LCD display, fully closed touch keyboard. The system has high reliability, high precision, low noise, easy operation and other characteristics. Through the relevant operation, you can be familiar with the operating characteristics of automatic robot, master its control theory and control modes, it cultivates students' corresponding knowledge and technical skills, and it is suitable for higher educational college, secondary vocational schools and technical schools related professional teaching and skills training evaluation.
