

Product Name :
Auto Sorting Trainer

Product Code :
MCHT0015

Description :

Auto Sorting Trainer

Technical Specification :

This equipment is the actual automatic warehouse system miniature, the use of PLC (programmable logic controller) control, equipment, the control mechanism and transmission mechanism, steering gear,

Goods and grab the rotation mechanism, and a unit warehouse, in three direction accurate mobile storage, transfer of goods, stacking machine structure, can be used

Manual or automatic two models complete warehousing and outbound operation, perfect actuator can provide modern logistics system to be automatic storage systems all action

Process and the opening of the actuator, according to different control scheme, programming constitute different execution system and adapt to the different levels of personnel

PLC learning and programming. Also can be used as subject design or research use.
