

Product Name :
Automatic System to Operate Industrial Process**Product Code :**
MCHT0026**Description :**

Automatic System to Operate Industrial Process

Technical Specification :

This training equipment contains multi types industrial sensors, pneumatic control unit, electric switch, PLC programmable controller, HMI. It contains distribution unit(another name feed unit, load unit), testing module, sorting storage module, it's a mechatronics training platform. It is based on PPI communication, PLC distributed control method, touch screen communicate with PLC method, to cultivate students knowledge and technical skills, it's suitable for engineering universities, colleges, training institute, technical schools, engineer training centers.
