

Product Name :
Proximity Sensor Training Set

Product Code :
MCHT0028

Description :

Proximity Sensor Training Set

Technical Specification :

This training device is an innovative and open system that is suitable for a wide range of applications, is flexible, flexible, modular, and fully uses the sensor components used in industrial production. It can make students in school. During the period, you will understand the actual situation of testing and control in modern production. By learning and actually assembling and developing the design, mastering the application technology of all aspects of sensor technology, you can expose problems, solve problems and learn more practices by yourself. Knowledge, open up thinking, improve hands-on ability and practical ability, cultivate students' corresponding knowledge and skills, suitable for higher vocational, higher vocational, secondary vocational schools and technical school related professional teaching and skills training assessment.

This training system is not only for students in school, but also for technical personnel in industrial electrical, mechatronics engineering, mechanical and electrical equipment installation, power electrical, electronic equipment installation, automatic processing, adjustment and control technology, mechanical manufacturing and electrical Engineer training, electrical engineer training for process and process management, etc.
