

Product Name :
Multi function Process Control Teaching System

Product Code :
EEPLC78P0011

Description :

Multi function Process Control Teaching System

Technical Specification :

This training device can be combined with PLC module to carry out various process control experiments. The whole equipment adopts aluminum profile frame structure and industrial profiles with special molds. The structure is scientific and the appearance is beautiful.

The training device is composed of water tank, pneumatic control proportional valve, pressure regulating valve with filtering function, PH value sensor, conductivity sensor, NTC temperature sensor, electronic console and stirring motor.
