

Product Name :

General Cycle Refrigeration Trainer With Data Acquisition System

Product Code :

RCTE0006

**Description :**

General Cycle Refrigeration Trainer With Data Acquisition System

Technical Specification :

This trainer introduces the student to the basics of refrigeration system used in refrigerator and air conditioning. Students learn about practical knowledge of vapor-compression refrigeration cycle operation. The trainer contains the basic components found in many refrigeration and air conditioning systems. These components have been mounted onto a special frame and are clearly laid out and identified for student examination.
