

**Product Name :**  
Air Conditioning Laboratory Unit Refrigeration**Product Code :**  
RCTE0007**Description :**

Air Conditioning Laboratory Unit Refrigeration

**Technical Specification :**

The system should be mounted on a movable bench with all refrigeration components clearly visible and controls are within easy access. Supply air is moved through a air ventilation duct which are made from polypropylene (PP) ducting covered with acrylic panels (plexiglass) to facilitate observations of the air condition in several monitoring points along the duct. All materials are corrosion resistant including all fasteners are stainless steel, industrial fan with plastic housing, and the humidification tank is made from stainless steel.
