

**Product Name :**  
Computerized Trainer On Thermodynamic Cycle Of  
Compressed Air

**Product Code :**  
RCTE0009

**Description :**

Computerized Trainer On Thermodynamic Cycle Of Compressed Air

**Technical Specification :**

This trainer is designed to study character of a 2-step air compressor, observe and study character of compressed air, when running, it needs to be connected with compressed-air dehumidification trainer at the same time to make sure air in storage tank is available compressed air which is dry and clean. This training equipment simplify data acquisition process, using proper sensor and processor to show experiment data on computer and achieve control of computer on trainer.
