

Product Name :
Trainer For The Study Of A Chiller

Product Code :
RCTE0013

Description :

Trainer For The Study Of A Chiller

Technical Specification :

This trainer is designed to study heat exchange system of a plate heat exchange device, in-depth study working principle and character of plate heat exchanger. It is to train and master professional theory and practical skill of air conditioning and refrigerating technology, to train technical upgrading technology, reformation design, installation, debugging, maintenance, repair, technical management on air conditioning and refrigerating equipment. This training equipment simplify data acquisition process, using proper sensor and processor to show experiment data on computer.
