

Product Name :
Computerized Industrial Refrigeration Trainer

Product Code :
RCTE0028

Description :

Computerized Industrial Refrigeration Trainer

Technical Specification :

This trainer is designed to study industrial refrigeration, its main objective is to control temperature and relative humidity of one or more refrigerating chamber. if so, one specific compressor and one specific condenser are used for 2 different refrigerating chambers, one is for freezing, one is for refreshment. This training equipment simplify data acquisition process, using proper sensor and processor to show experiment data on computer.
