

Product Name :
Refrigeration Cycle Demonstration Bench

Product Code :
RCTE0033

Description :

Refrigeration Cycle Demonstration Bench

Technical Specification :

The experiment device introduces the refrigeration circulation system in detail, and includes the temperature, pressure, flow and other sensors, as well as the data acquisition and graphic simulation software. Grasp the refrigeration cycle system through experiment, the control principle and control mode, the corresponding knowledge and skills, to cultivate students fit, higher vocational colleges, secondary vocational schools and vocational school related professional teaching and skills training examination.
