

Product Name :
Energy Efficiency In Refrigeration Systems**Product Code :**
RCTE0041**Description :**

Energy Efficiency In Refrigeration Systems

Technical Specification :

The training device, designed correctly for teaching purposes, allows students to study the specific operation and working principle of an evaporator, 3 compressors and a condenser refrigeration unit. The combination of hardware and software makes students understand more thoroughly. Through relevant experiments, you can familiarize yourself with the control principles and control methods of multi-line group refrigeration training devices, and cultivate students' corresponding knowledge and skills. It is suitable for teaching and skill training in higher vocational colleges, secondary vocational schools, and technical schools. Assessment.
