

Product Name :

Training Model Of Practice Of One-Way Air Conditioner
With Ceiling And Ceiling Connection

Product Code :

RCTE0047

**Description :**

Training Model Of Practice Of One-Way Air Conditioner With Ceiling And Ceiling Connection

Technical Specification :

1. The device adopts real household central air conditioning for practical training and evaluation: the system uses one to three units, which is characterized by excellent quality, small size, compressor, digital capacity adjustment solenoid valve to control the compressor through pressure to achieve unloading / load purpose. Corresponding to different terminal processors, it can realize the stepless adjustment of the capacity in the range of 10% -100% by changing the compressor unload / load ratio.
2. System terminal processor diversification: three types of terminal processing units are used: patio (embedded), wall-mounted, and fan coil units; let students understand the diverse structure of indoor units.
