

Product Name :
Pipes Fluid Friction Venturi Method Hydraulic Bench**Product Code :**
FUDE0034**Description :**

Pipes Fluid Friction Venturi Method Hydraulic Bench

Technical Specification :

The system of the training equipment can simulate measurement of pipeline one-way resistance and principle and process of Venturi meter, and make student have an elementary direct cognition on pipeline one-way resistance and Venturi meter. It is equipped with storage water tank, experiment water tank and metering water tank, the experiment pipeline is transparent pipe, the measuring equipment is U-type differential pressure gauge, the process of experiment is clear, and it is easy for student to operate and understand the experiment process. It can train corresponding knowledge and skills on student, and it is suitable for teaching and skills training examine of related majors of vocational training school, technician training school and so on.
