

Product Name :

Didactic Station for Control Level, Flow, Pressure and Temperature

Product Code :

THML0030

**Description :**

Didactic Station for Control Level, Flow, Pressure and Temperature

Technical Specification :

Actuators, position valves, ball valve and warmer

Application for teaching continuous, discontinuous and automatized processes

2 deposits

Software

Component installation: Montage frame with profile panel and tubing system

HMI Screen for process visualization

Sensors: Capacitive, float, ultrasonic, flow, pressure and temperature

Sensors: 8

Electric tension 120 to 240V

With polycarbonate deposit as liquid storage

Equipments Exporters
