

Product Name :
High Speed Directional Pulse Hole Metallizing

Product Code :
PCBL0013

Description :

High Speed Directional Pulse Hole Metallizing

Technical Specification :

1. Use high speed pulse power source for plating, supply uniform good quality coating.
2. Fully ABS engineer plastic machine body and inner groove, with antiseptic, thermo stability, technology flow is beautiful.
3. Environment protection black hole technology flow application, No pollution, it can direct discharge.
4. Cathode oscillation technology, prevent , concentration gradient, add hole inner liquid flowability.
